Our chakras by the knees and feet have now become smaller. The reason is that we shall be more in ourselves and less connected to the Old Earth's energy field. When we are on the New Earth, those chakras will become bigger once again to manifest our connection/link to the New Earth and all its energy fields. For some, these changes might be painful and not a positive experience.

The Sun Chakra connects us more and deeper together with the Universe and the Divine in The Central Sun. We will have contact with the entire Blue Creation's power and flow and it will make us members of the Universe and the Whole.
